

ADARSH GADEKAR

Java Full-Stack Developer

+91 9673559349 | adarshgadekar58@gmail.com | [LinkedIn](#) | [Portfolio](#) | India

SUMMARY

Java Full-Stack Developer with hands-on project experience across Java, Spring Boot, Spring Data JPA, Hibernate, JDBC, Servlets, JSP, SQL, and React. Skilled in building CRUD applications using SDLC and MVC architecture, optimizing SQL queries with joins and indexing, and managing sessions and version control with Git.

SKILLS

Programming Languages: Java, JavaScript, SQL, PL/SQL, HTML5, CSS3

Frameworks: Spring Boot, Spring MVC, JSP, React, Spring Data JPA, Hibernate

Backend: Core Java, JDBC, MVC Architecture, RESTful Concepts

Database: Oracle SQL, MySQL, PL/SQL, RDBMS, Database Normalization, Joins, Indexing, Query Optimization, Stored Procedures, Triggers

Cloud & Tools: Eclipse, VS Code, Oracle Database 21c, Git, GitHub, Maven/Gradle, AWS

Core Concepts: OOP, Collections Framework, Exception Handling, Multithreading Basics

PROJECT EXPERIENCE

Student Management Portal — Java Web Application

Java, Servlets, JSP, JDBC, Oracle SQL, HTML/CSS/JavaScript

- Designed and developed a 3-tier MVC Student Management Portal handling 20+ student records with full CRUD functionality, replacing manual record-keeping using Java Servlets, JSP, and Oracle SQL.
- Built secure user workflows across 4 modules using HTTP sessions, form validation, and JDBC PreparedStatements to ensure reliable database transactions.
- Optimized 10+ Oracle SQL queries using joins and indexing, cutting data retrieval time by 30%.
- Implemented a reusable DAO architecture spanning 6 modules, improving maintainability and enabling future feature expansion.

Employee Lifecycle Management System — Backend Application

Java, JDBC, Oracle SQL

- Developed secure CRUD operations for 250+ employee records using Java, JDBC, and Oracle SQL.
- Designed a normalized relational schema across 4 tables, minimizing redundancy and improving data consistency.
- Used JDBC PreparedStatements with parameterized queries across 5 endpoints to prevent SQL injection.
- Improved SQL query performance by 25% through indexing and optimized joins.

Food Ordering & Delivery Management System — Full Stack Application

Java, Spring Boot, Spring Data JPA, Hibernate, MVC Architecture, JSP, HTML, CSS, JavaScript, Bootstrap

- Built a full-stack food ordering platform covering 5 core modules — restaurant browsing, menu selection, order placement, address management, and delivery tracking.
- Implemented modular business logic across 5 domain entities (customers, restaurants, menu items, orders, delivery partners) using Core Java, OOP, and Collections.
- Modeled 7 entity relationships using Spring Data JPA/Hibernate annotations, including @Entity, @Id, @OneToMany, @ManyToOne, and @JoinColumn.
- Designed an order lifecycle workflow with 4 validated status transitions, from order placement through restaurant confirmation.

TRAINING

Java Full-Stack Development Training — NareshIT Technologies May 2026

- Completed hands-on, project-based training in Core Java, JDBC, Servlets, JSP, HTML, CSS, JavaScript, Bootstrap, SQL, Spring Boot, Spring Data JPA, and Hibernate MVC architecture through guided builds and real-time coding exercises.

EDUCATION

B.Tech, Computer Science & Engineering — 2022–2026

Bharat Ratna Indira Gandhi College of Engineering, Solapur

12th Standard (MSBSHSE) — 72.17% — 2021

C. B. Khedgi's College, Akkalkot, Solapur

10th Standard (MSBSHSE) — 73.40% — 2019

Shree Shardamata English Medium High School, Akkalkot
